

Assembling Ericksonian Therapy: The Collected Papers of Stephen Lankton

Foreword by Ernie Rossi, Ph.D.

"When hypnosis escapes from stereotyped technique, it frees the imagination in unexpected ways. In these Selected Papers, Stephen Lankton reflects systems theory while also expressing ideas free from restraint. His appreciation of Milton Erickson is impressive and respectful. The illustrative cases offer a comprehensive review of hypnotic ideas. The reader will find the ideas both practical and imaginative, dealing with hypnotic technique as well as such areas as family violence. This is an expansive presentation of papers ranging from the ideology of Erickson to using therapeutic metaphor in social work."

Jay Haley, author of Uncommon Therapy, Advanced Techniques, Conversations with Milton Erickson and others.

"Stephen Lankton's lucid and readable prose puts the principles and applications of Ericksonian Therapy easily within the grasp of his readers. It is a pleasure to share in his insights, analyses, and therapeutic approaches."

Alexander A. Levitan, M.D., M.P.H., Past President - ASCH, American Board of Medical Hypnosis, Minnesota Society of Clinical Hypnosis.

"This collection of excellent papers from Stephen Lankton reveals why he has been at the forefront of the fields of hypnosis and brief, goal-directed psychotherapies for more than two decades."

Michael D. Yapko, Ph.D., author of Trancework and Breaking the Patterns of Depression.
